

## UNLEASHING LABEL-FREE SENSING SURFACE PLASMON RESONANCE

Easy integration with Affinité's portable SPR to get real-time insights into biological pathways and mechanisms with our kinetics module

## 2500 2000 1500 Ka (1/Ms) Kd(1/s) KD (M) 0 500 Time / min

## KNX2 DUAL-CHANNEL INJECTION LOOP MODULE

## **MAIN FEATURES**

Convenient switch between manual or loop injections at any point during a run

Internal trap for eliminating air bubbles

Flow rate: 5-150 µL/min

Custom sample loop sizes available

High efficiency pulse dampening for reduced background noise

Single or dual channels

Inert material tubing for biological and chemical sample compatibility Simple prime and flow control functions with intuitive GUI
